 BUT FIRST, PLEASE ANSWER THE FOLLOWING QUESTION

Using Slido, Please Answer this Question:
“What is your biggest concern about the 2020 Census?”

To access Slido:
• Point your browser to www.slido.com
• Enter the following Event Code: #H915
• Select “Polls” and enter your response

We’ll display the answers at the end of lunch.
The tour walks through the main data pages and sources.

- The major categories in the banner
- Cool features on the “Interactive Data” page
The “Population” Page

The State Demography Office has produced an update to its population estimates and forecasts to incorporate the recently released 2010 Census count population totals. The files are available with the 2010 Census data.
Population Totals for Colorado and Sub-State Regions

Historical Census – years (1790 to 2010)

Population totals for Colorado, counties & places, 1870 to 2010 are available here.

Historical Census data can also be obtained through the National Historical Geographic Information System. This site presents data for the people and the economy of the U.S. for each state and county from 1790 to 1980.

Population Estimates – years (1985 to Current)

Population estimates are produced annually by the State Demography Office. The most recent estimate available is for the year of 2017 and was finalized in August of 2018.

- Final Estimates, State, Sub-state regions, and Counties 2000 to current

User Lookup:

This option allows the user to select any combination of state, counties or municipalities for the year 2010 to current.

County Profile:

The County Profile database allows the user to select population estimates along with other variables, for years 1985 to present.

Population Forecasts – years (2000 to 2050)

Population forecasts are produced annually by the State Demography Office. Our most recent forecasts were produced in November 2017.

These tables illustrate the population for future years, based on plausible courses of future population change (see Forecasts Methodology for more Information.) The forecasts for the State of Colorado & Sub-state regions are available for the years 2000 to 2050.

- 5 year increments, 2000 - 2050
- 1 year increments, 2000 - 2050

Race and Hispanic Origin

U.S. & States
- Census. Through American FactFinder, you will be able to obtain a multitude of data that is cross-tabbed by race & ethnicity. Data are available from the 2010 Census and the American Community Survey.
- Estimates (census.gov). Population estimates produced by the U.S. Census Bureau by Race & Ethnicity are published for the U.S. for years 2000 to current.
- Forecasts (census.gov). The population projections program of the U.S. Census Bureau produces projections of the resident population for the years 2000 to 2050.

Colorado & Counties
- Historical Census. This 1990 Census excel table illustrates race and Hispanic origin data for Colorado & Counties. Data from the 2000 Census is available via American FactFinder (census.gov).
- Census. In addition to the 2010 Census data available via American FactFinder, the State Demography Office has also posted tables featuring race and Hispanic origin data on our 2010 Census data page.
- Estimates (census.gov). The U.S. Census Bureau publishes county population estimates each year for total population with details on age, sex, race and Hispanic origin. The reference date for these estimates is July 1, 2000 to 2009.
- Forecasts. Population forecasts by race and ethnicity are produced annually at the state level only by the State Demography Office. The most recent forecasts were produced in October 2011. The forecasts are based on data from the 2000 Census Modified Race Data and expected trends in fertility and survival based on race specific birth and death data released by the Colorado Department of Public Health and Environment. Also available in Excel.
- Population by County, Age, Race and Gender. Population estimates are produced annually by the State Demography Office. These tables are estimates of the population’s age, sex, race and ethnic distribution by country for the years beginning in 2000 through 2010. These data are based on distributions from the 2000 and 2010 Census of age, sex, race and ethnicity. However, the race categories released by the Census Bureau have been bridged to the following five race categories: White non-Hispanic, Hispanic, Black non-Hispanic, Asian/PI non-Hispanic and AI/AN non-Hispanic. Please contact Cindy Degroen with any questions regarding the estimates or the bridging methods.
- Population Forecast by County, Age, Race and Gender. Forecast 2010-2050. Please contact Cindy DeGroen with any questions regarding the estimates or the bridging methods.

Municipalities
- Census (census.gov). Through American FactFinder, you will be able to obtain a multitude of data this is cross-tabbed by race and ethnicity. Data are available from the 2010 Census and the American Community Survey. The State Demography Office has also posted tables featuring race and Hispanic origin data on our 2010 Census data page.
- Estimates and Forecasts by race and Hispanic origin are not available for Colorado municipalities.

- Where People Live

Labor Force Forecast

Colorado’s labor force, the number of people working or looking for work, has undergone significant changes over the last several decades. Driven, in large part, by the changing age distribution of Colorado, growth rates of the labor force are expected to slow significantly over the forecast horizon of 2040 as compared to historical growth. We are currently nearing the middle of a decade during which Colorado’s older population will rapidly become a larger share of its total population. In the long run, the trend of growth in the labor force for Colorado will reflect the aging of the post-World War II baby boomers as well as the migrants that have and will continue to relocate to Colorado for jobs. The labor force in 2040 will look considerably different from today’s labor force. The labor force in 2040 will be much larger in number, it will be older, and it will include a larger share of females. Additionally, the labor force will be smaller relative to the total population it supports. Impacts include increased competition for the pool of skilled workers available, the potential slowing of housing development, and downward pressure on income. This report describes the changing age distribution of Colorado, its impacts on the labor force, as well as the potential impacts of the changes in the labor force. The data for this report are based on the 2008-2010 American Community Survey, the 2010 Current Population Survey, and the 2012 National BLS forecasts for labor force participation by age group.

Municipal Boundary Map

https://demography.dola.colorado.gov/CO_Muni/
Census API

Allows selection of specific data tables from the Decennial Census and the American Community Survey

http://coloradodemography.github.io/CensusAPI/
Age Animations
http://dola.colorado.gov/maps

Colorado 1990

Displays single year of age data coded into “generations” from 1990 to 2050
Provides animation to show population change over time
Animations and images are downloadable
